DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 11/9/2006, with respect to claims 1-10, rejected under 101, have been fully considered but they are not persuasive.
2. As claimed, the frame of claim 1 is non-functional descriptive material. Non-functional descriptive material has no practical application and does not gain patentability by being claimed in connection with a computer readable medium. See page 51 of the interim guidelines for further explanation. Although the preamble was amended, claims 1-10 are still directed to a structure for a data frame.
3. Applicant's arguments, see page 10, filed 11/9/2006, with respect to claims 1-14, rejected under 102, have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-10 are directed to frame formats. As currently claimed the frames are non-functional descriptive material, which is not patentable. Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). If the frame is interpreted as a signal, it is still unstatutory because claims that

Art Unit: 2616

recited nothing but the physical characteristics of a form of energy, define energy and as such are nonstatutory natural phenomena. O'Reilly, 56 U.S. (15 How.) at 112-14. Moreover, a claim reciting a signal encoded with functional descriptive material does not fall within any of the categories set forth in 101. The patentability guidelines can be found at the office website at: http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf.

Annex IV, beginning on page 50, is the computer related section.

Allowable Subject Matter

5. Claims 11-17 are allowed.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
